### 2. Hazard Identification

#### Approval

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2020). The substance has been classified as hazardous according to the criteria in the Hazardous substances (Hazard Classification) Notice 2020.

#### GHS 7 Classes

Skin irritant category 2  
Eye irritant category 2

#### Hazard Statements

H315 - Causes skin irritation.  
H319 - Causes serious eye irritation.

#### SYMBOLS

## WARNING

#### Other Classifications

There are no other classifications that are known to apply.

#### Precautionary Statements

|            |                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Prevention | P103 - Read label before use.<br>P264 - Wash hands thoroughly after handling.<br>P280 - Wear protective gloves/protective clothing/eye protection/face protection.                                                                                                                                                                                                                                                                  |
| Response   | P302+P352 - IF ON SKIN: Wash with plenty of soap and water.<br>P332+P313 - If skin irritation occurs: Get medical advice/ attention.<br>P362 - Take off contaminated clothing and wash before re-use.<br>P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>P337+P313 - If eye irritation persists: Get medical advice/attention. |
| Storage    | no storage statement                                                                                                                                                                                                                                                                                                                                                                                                                |
| Disposal   | P501 - Dispose of contents/container in accordance with local/regional/national/international regulation.                                                                                                                                                                                                                                                                                                                           |

# Rapid Tutti Fruitti Disinfectant

## Safety Data Sheet

### 3. Composition / Information on Ingredients

| Component                     | CAS/ Identification | Conc (%)  |
|-------------------------------|---------------------|-----------|
| water                         | 7732-18-5           | >60%      |
| Quaternary ammonium compounds | proprietary         | >1% - <3% |
| Surfactant                    | 127087-87-0         | 1-10%     |
| fragrance                     | proprietary         | 0.1-1%    |
| dyes                          | proprietary         | <0.1%     |

This is a commercial product whose exact ratio of components may vary slightly. Trace quantities of impurities are also likely.

### 4. First Aid

#### General Information

If medical advice is needed, have product container or label at hand. You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).

#### Recommended first aid facilities

Ready access to running water is recommended. Accessible eyewash is recommended.

#### Exposure

##### Swallowed

IF SWALLOWED: Call a POISON CENTRE or doctor/physician if you feel unwell. Rinse mouth. Do NOT induce vomiting. Give a glass of water to drink.

##### Eye contact

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

##### Skin contact

IF ON SKIN: Flush immediately with large amounts of water. If skin irritation occurs: Get medical advice/ attention.

##### Inhaled

Generally, inhalation of vapours is unlikely to result in adverse health effects. If coughing, dizziness or shortness of breath is experienced, remove the patient to fresh air immediately. If patient is unconscious, place in the recovery position (on the side) for transport and contact a doctor.

#### Advice to Doctor

Treat symptomatically

### 5. Firefighting Measures

#### Fire and explosion hazards:

There are no specific risks for fire/explosion for this chemical. It is not classed as flammable.

#### Suitable extinguishing substances:

Carbon dioxide, extinguishing powder or water jet. Fight larger fires with water jet or alcohol resistant foam.

#### Unsuitable extinguishing substances:

Unknown.

#### Products of combustion:

Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water. May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying spaces, forming potentially explosive mixtures.

#### Protective equipment: Hazchem code:

No special measures are required.  
NA

### 6. Accidental Release Measures

#### Containment Emergency procedures

In all cases design storage to prevent discharge to storm water.

If a significant spill occurs:

Stop leak if safe/necessary; Isolate area. Collect spill – see below; Transfer to container for disposal. Dispose of according to guidelines below (Section 13).

#### Clean-up method

Use absorbent (soil, sand or other inert material). Rags are not recommended for the clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or waterways has occurred advise local emergency services.

#### Disposal

Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.

# Rapid Tutti Fruitti Disinfectant

## Safety Data Sheet

### Precautions

Wear skin and eye protection. Spill may be slippery.

# Rapid Tutti Fruitti Disinfectant

## Safety Data Sheet

### 7. Storage & Handling

#### Storage

Avoid storage of harmful substances with food. Store out of reach of children. Containers should be kept closed in order to minimise contamination. Keep from extreme heat and open flames. Avoid contact with incompatible substances as listed in Section 10.

#### Handling

Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements.

### 8. Exposure Controls / Personal Protective Equipment

#### Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m<sup>3</sup> for respirable particulates and 10mg/m<sup>3</sup> for inhalable particulates when limits have not otherwise been established.

| NZ Workplace Exposure Stds | Ingredient | WES-TWA | WES-STEL |
|----------------------------|------------|---------|----------|
| -                          | -          | -       | -        |

#### Engineering Controls

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

#### Personal Protective Equipment

##### General

Personal Protective Equipment (PPE) should not be used as the primary means of exposure protection, except in the event of an accident or emergency situation or where all other means of protection have proven to inadequate. Clean PPE after use or dispose of as appropriate. Store PPE for re-use in a clean place. Regular training on the correct use of PPE should be provided. In particular the correct fitting and use of respirators and where applicable the cleaning of respirators should be undertaken.

##### Eyes

Avoid contact with eyes. Use safety glasses and or chemical splash goggles if splashes are possible, e.g. when handling the mixture in bulk.. Select eye protection in accordance with AS/NZS 1337.

##### Skin

Protective gloves are recommended. Nitrile rubber gloves are recommended. Protective gloves or suitably resistant material must comply with AS 2161. Replace frequently. Gloves should be checked for tears or holes before use. Protective clothing must comply with AS 2919, AS3765.1 or AS3765.2. PVC or rubber boots must comply with AS/NZS 2210.2 and selected and maintained in accordance with AS/NS2210.1.

##### Respiratory

Respirator is not required under normal use. Ensure adequate natural ventilation. If product is being used in confined conditions, the use of a mask or respirator may be preferred.

#### WES Additional Information

Not applicable.

### 9. Physical & Chemical Properties

|                                |                      |
|--------------------------------|----------------------|
| Appearance                     | blue clear liquid    |
| Odour                          | lavender             |
| Odour Threshold                | no data              |
| pH                             | 6.0-8.0              |
| Freezing/melting point         | no data              |
| Boiling Point                  | no data              |
| Flashpoint                     | non flammable        |
| Flammability                   | non flammable        |
| Upper & lower flammable limits | no LEL or UEL        |
| Vapour pressure                | no data              |
| Vapour density                 | no data              |
| Specific gravity/density       | 1.0g/cm <sup>3</sup> |
| Solubility                     | miscible in water    |
| Partition coefficient          | no data              |
| Auto-ignition temperature      | no data              |
| Decomposition temperature      | no data              |
| Viscosity                      | no data              |
| Particle Characteristics       | no data              |

### 10. Stability & Reactivity

|                                    |                                                                                                           |
|------------------------------------|-----------------------------------------------------------------------------------------------------------|
| Stability                          | Stable                                                                                                    |
| Conditions to be avoided           | Containers should be kept closed in order to avoid contamination. Keep from extreme heat and open flames. |
| Incompatible groups                | Strong acids, oxidisers (e.g. bleach)                                                                     |
| Substance Specific Incompatibility | none known                                                                                                |
| Hazardous decomposition products   | none known                                                                                                |
| Hazardous reactions                | none known                                                                                                |

### 11. Toxicological Information

#### Summary

IF IN EYES: direct contact with the concentrate may cause eye irritation.  
IF ON SKIN: direct contact with the concentrate may result in skin irritation.  
CHRONIC TOXICITY: no effects are known.

#### Supporting Data

|                |                                                    |                                                                                                                                                                                                                                                                                        |
|----------------|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Acute</b>   | <b>Oral</b>                                        | Using LD <sub>50</sub> 's for ingredients, the Acute Toxicity Estimate (ATE) (oral) for the mixture is >2,000 mg/kg. Data considered includes: Quaternary ammonium compounds 344mg/kg (rat), surfactant 1310mg/kg (rat),<br>EDIT: This mixture is not considered an aspiration hazard. |
|                | <b>Aspiration</b>                                  |                                                                                                                                                                                                                                                                                        |
|                | <b>Dermal</b>                                      | Using LD <sub>50</sub> 's for ingredients, the Acute Toxicity Estimate (ATE) (dermal) for the mixture is >2,000 mg/kg. Data considered includes: Quaternary ammonium compounds 3340mg/kg (rat).                                                                                        |
|                | <b>Inhaled</b>                                     | Using LD <sub>50</sub> 's for ingredients, the Acute Toxicity Estimate (ATE) (inhalation) for the mixture is >5mg/L/4h.                                                                                                                                                                |
|                | <b>Eye</b>                                         | The mixture is considered to be an eye irritant, because some of the ingredients Quaternary ammonium compounds and the surfactant present are considered eye irritants in more concentrated form.                                                                                      |
|                | <b>Skin</b>                                        | The mixture is considered to be a skin irritant, because Quaternary ammonium compounds and the surfactant present are considered skin irritants in more concentrated form.                                                                                                             |
| <b>Chronic</b> | <b>Sensitisation</b>                               | No ingredient present at concentrations > 0.1% is considered a sensitizer.                                                                                                                                                                                                             |
|                | <b>Mutagenicity</b>                                | No ingredient present at concentrations > 0.1% is considered a mutagen.                                                                                                                                                                                                                |
|                | <b>Carcinogenicity</b>                             | No ingredient present at concentrations > 0.1% is considered a carcinogen.                                                                                                                                                                                                             |
|                | <b>Reproductive / Developmental</b>                | No ingredient present at concentrations > 0.1% is considered a reproductive or developmental toxicant or have any effects on or via lactation.                                                                                                                                         |
|                | <b>Systemic Aggravation of existing conditions</b> | No ingredient present at concentrations > 1% is considered a target organ toxicant.<br>None known.                                                                                                                                                                                     |

# Rapid Tutti Frutti Disinfectant

## Safety Data Sheet

### 12. Ecological Data

#### Summary

This mixture is not classed as ecotoxic under GHS 7. However in all cases prevent run-off to drains, sewers and waterways.

#### Supporting Data

|                                 |                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Aquatic</b>                  | Using EC <sub>50</sub> 's for ingredients, the calculated EC <sub>50</sub> for the mixture is > 100 mg/L. Data considered includes: Quaternary ammonium compounds LC <sub>50</sub> for freshwater fish: 515 µg/L, EC <sub>50</sub> / LC <sub>50</sub> for freshwater invertebrates: 16 µg/L, EC <sub>50</sub> for freshwater algae: 30 µg/L. |
| <b>Bioaccumulation</b>          | This mixture is not considered bioaccumulative.                                                                                                                                                                                                                                                                                              |
| <b>Degradability</b>            | Quaternary ammonium compounds is considered biodegradable.                                                                                                                                                                                                                                                                                   |
| <b>Soil</b>                     | No evidence of soil toxicity.                                                                                                                                                                                                                                                                                                                |
| <b>Terrestrial vertebrate</b>   | No evidence of ecotoxicity towards terrestrial vertebrates.                                                                                                                                                                                                                                                                                  |
| <b>Terrestrial invertebrate</b> | No evidence of ecotoxicity towards terrestrial invertebrates.                                                                                                                                                                                                                                                                                |
| <b>Biocidal</b>                 | no data                                                                                                                                                                                                                                                                                                                                      |

### 13. Disposal Considerations

|                               |                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Restrictions</b>           | There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.                                                                                                                                                                                                        |
| <b>Disposal method</b>        | Disposal of this product must comply with the Hazardous Substances (Disposal) Notice 2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore rendered non-hazardous before discharge to the environment.                                               |
| <b>Contaminated packaging</b> | Disposal of contaminated packaging must comply with the Hazardous Substances (Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible reuse or recycle packaging. |

### 14. Transport Information

#### Land Transport Rule: Dangerous Goods 2005 - NZS 5433:2007

There are no specific restrictions for this product (not a dangerous good).

# Rapid Tutti Fruitti Disinfectant

## Safety Data Sheet

### 15. Regulatory Information

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2020. All ingredients appear on the New Zealand Inventory of Chemicals NZIoC.

#### Specific Controls

Key workplace requirements are:

|                                 |                                                                                                                                                                       |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SDS                             | To be available within 10 minutes in workplaces storing any quantity.                                                                                                 |
| Inventory                       | An inventory of all hazardous substances must be prepared and maintained.                                                                                             |
| Packaging                       | All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been supplied |
| Labelling                       | Must comply with the Hazardous Substances (Labelling) Notice 2017.                                                                                                    |
| Emergency plan                  | Not required.                                                                                                                                                         |
| Certified handler               | Not required.                                                                                                                                                         |
| Tracking                        | Not required.                                                                                                                                                         |
| Bunding & secondary containment | Not required.                                                                                                                                                         |
| Signage                         | Not required.                                                                                                                                                         |
| Location compliance certificate | Not required.                                                                                                                                                         |
| Flammable zone                  | Not required.                                                                                                                                                         |
| Fire extinguisher               | Not required.                                                                                                                                                         |

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.

#### Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

### Disclaimer

This SDS was prepared by INTEGRA INDUSTRIES LTD and is based on our current state of knowledge, including information obtained from suppliers. The SDS is given in good faith and constitutes a guideline (not a guarantee of safety). The level of risk each substance poses is relevant to its properties (as summarised in the SDS) AND HOW THE SUBSTANCE IS USED. While guidelines are given for personal protective equipment, such precautions must be relevant to the use. The likely GHS 7 classifications for this SDS have been estimated based on general information from the supplier (e.g., hazard, toxicological). This SDS is copyright INTEGRA INDUSTRIES LTD and must not be copied, edited or used for other than intended purpose. To contact the SDS author, email [sales@integraindustries.co.nz](mailto:sales@integraindustries.co.nz) or phone: +64 3 455 6805.
