

Introducing our new luxury range EXECUTIVE. A collection of eco-friendly packaged amenities, designed specifically for the accommodation provider that prioritizes luxury and sustainability, together with high quality and customer appeal.

Our collection, made with 50% Recycled Post Consumer plastics and biodegradable ingredients, our formulations have zero Sulphates, no Parabens and silicone. This range offers guests a superior experience without compromising on quality.

By choosing EXECUTIVE, your accommodation property will be providing a ultra-high standard of hotel amenities with environmentally responsible packaging saving on the earth's raw materials and recycling to reduce waste.

For this range we have chosen a beautiful fragrance that will delight, a fruity fragrance with hints of Cloves, Nutmeg and citrus.

Innovative Design

Our new Floating dispensers are not only visually appealing but also engineered for superior performance. The lockable feature ensures security and prevents tampering. Guests and customers will appreciate the seamless experience these dispensers provide, adding a touch of luxury to their visit.

Efficient and Cost-Effective

The Executive dispensing range is designed with cost-effectiveness in mind. The refillable nature of the dispensers reduces the need for frequent replacements, significantly lowering housekeeping time and costs. The system is easy to maintain, ensuring that your staff spends less time on upkeep and more time on other essential tasks.

User-Friendly Experience

Our dispensers offer unparalleled convenience, making them an excellent choice for any establishment. The user-friendly and easily distinguished lettering design ensures that guests can easily access the amenities they need, enhancing their overall experience. Whether it's a motel/hotel, spa, Gym or office bathroom, the Executive dispensing range provide an effortless solution that will impress every time.

Saving the Planet with Innovations

Innovative Solutions for a Sustainable Future

At Accom Assist, we believe in the power of innovative solutions to protect our planet. One of our key strategies is the sustainable use of raw materials in our packaging.

Among our most significant contributions to this effort are our convenient refill packs, which consist of 2 x 5L containers with a pump packed in a single carton. This thoughtful refilling solution not only simplifies the process of filling dispenser bottles but also brings numerous environmental and logistical benefits. This type of packaging also makes it much easier for staff to handle bulk products.
