- Natural healing of jelly bush honey

### ingredients

100% plant-based fibres, water, Melaleuca (Jelly Bush Honey), sodium edetate, methylpropanediol, caprylyl glycol, benzoic acid

### description

Soothe Baby Clean Wipes are designed to gently cleanse and help reduce the symptoms of diaper rash (diaper dermatitis). These wipes harness the natural healing power of Jelly Bush Honey to calm and soothe sensitive skin. Formulated with Australian native Jelly Bush Honey sourced from the unspoiled coastal regions of South East Queensland, this natural ingredient delivers several skin-loving benefits. Ideal for use on newborns, babies, and toddlers, these wipes are suitable for sensitive areas affected by nappy rash. They can also be used as an everyday gentle wipe to help protect against skin irritation and redness.

### directions

Gently cleanse skin by wiping the affected area. Dispose of used wipes properly and avoid reusing them. Allow the skin to dry before covering with clothing or a diaper. If using medicated creams for nappy rash, apply after using the wipe. These wipes may be used regularly to help prevent rash flare-ups. Always reseal the pack to prevent drying out. Caution: Discontinue use if irritation occurs.
